

Agro Food Grants

Food Future

'Food Future' focuses on innovation projects for companies in the food industry. Innovative projects carried out in cross border partnerships between Dutch and German companies and knowledge institutes qualify for funding. Projects can focus on product as well as process development, for instance to improve the quality of food.

- Eligible projects should be based on future-oriented technologies and innovations and knowledge / technology transfer.
- Budget: Grant is 40% for large companies (SME: 50%) and max 200.000 euro per project.
- Applications: Companies in the described region around the border of the Netherlands and Germany. Applications can be submitted until June 30, 2014.

GO-Efro

The aim of 'GO- Efro' is to stimulate innovation in the Dutch provinces of Gelderland and Overijssel. The program specifically focuses on Food projects and funds the development of new products, processes or systems.

- Budget: The total EU- budget is 75 million euro. Project costs should be at least 250.000 euro. The grant is up to 50%.
- Applications: Mainly SME in the provinces of Gelderland and Overijssel.
- Applications can be submitted throughout the year.

What can Finestri do for you?

Finestri assists companies particularly in the Agro&Food, Life Sciences and Manufacturing Industry with the procurement of grants and incentives. Our goal is to maximize grant incomes for our clients by taking a hands-on approach: from identifying grant opportunities, submitting successful grant applications and ensuring maximum payment of awarded grant amounts.
